This is bananas.

Last year we were in lockdowns for months on end, now we're dusting off our passports and getting back on planes.

We're going from nothing but Zoom meetings, to preparing to exhibit in person at more trade shows in the first 2 months of 2022 than we have in the last 2 years.

We're going from supply chain nightmares and inventory woes, to fully stocked warehouses that are standing by to ship out the same day.

We're going from winning another Red Dot Design Award and a clean sweep of 4 Good Design Awards, to...

feeling the pressure to back it up!

We're growing from a design team of 3 people, to a design team of 9 and will be launching more new products this coming year, than we have in any year since Dreamfarm began 18 years ago.

We're growing from a company that is smaller than you'd think, to one that is bigger, wiser, more experienced, and more prepared than ever before.

We're growing from 5 back-to-back months of record-breaking sales, to having a plan to grow more over the next 3 years than we have in the last 13.

Yes friends, 2022 is going to be all about growth.

It's going to be beyond crazy.

It's going to be bananas.

Bring it on.

The Story of Dreamfarm

Once upon a time in a land down under a twenty-two-year-old Lego-loving-MacGyver-wannabe named Alex, took his first invention, Grindenst in, down to the local markets to seek his fortune.

As luck would have it, on that day the owner of a nearby kitchenware store happened upon Alex with his creation. 'Hooray!' the man exclaimed, 'people have been asking me for something that does just this, but alas, no one has ever made one. I'd love to sell these in my store!'

It was on that day in 2003 that Dreamfarm, the problem-solving company that grows ideas into inventions, was born.

Three years of selling Grindenst ins by day, and assembling them by night, would pass before Alex had gathered enough pennies to launch Dreamfarm's next big idea, Scizza, the pizza scissors! One great idea had grown into two, and soon inventions three and four would follow. As if by magic, Dreamfarm was now available in over 500 stores, all of them hungry to see what nifty new things Dreamfarm would dream up next.

Meanwhile, on a cattle farm not so far away, Phil, a clever curly-haired kid who never could sit still, was finishing up design school and applied to join Dreamfarm. Alex and Phil quickly discovered they shared a rock-solid belief that great design must solve a problem and to be the best, you must do what has never been done before.

Together they worked to invent, design, create and make their ideas into the world's best and most useful things.

Like all great ideas do, Dreamfarm was growing:

Next to join the team was Cate, Alex's never-could-keep-a-secret sister, who would make it her mission in life to make sure the whole world knew what they were up to. A decade later, through blood, sweat, tears and Cate singing from the rooftops about their great ideas, Dreamfarm products could be found in thousands of stores around the world.

These days, the team at Dreamfarm is bigger, but they still do all of their inventing and design work themselves in sunny Brisbane, Australia, and they now have over three dozen original products to their name. If you're ever in town, you should pop in and say 'G'day'. Cate would love to tell you all about their latest creations, and while you'll have to do a little searching for them, somewhere out the back among all the tools and prototypes, you'll still find Alex and Phil in their workshop, tinkering away on their never-ending search for problems that need solving.
